AV Requirements

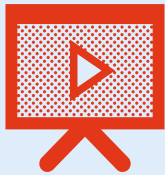

# Leanne Spencer AV Requirements

---

## Microphone

Leanne requires a headset or lapel microphone – no handheld mic please. Leanne moves around on stage throughout the keynote and a handheld microphone, along with a clicker, is very restrictive.

## Screen for slides

Leanne's slides are pictures that bring stories to life and assist your audience in understanding and retaining what Leanne is saying. Leanne is happy to send her slides to your AV team to be included in the master deck. We request a comfort screen so Leanne can see the slides progress in her peripheral vision, and also a clicker to move the slides forward. If you intend to use a projector, a ceiling-mounted projector is preferred (floor-mounted projectors usually mean Leanne cannot make full use of the stage without walking across the slides). Please advise on this ahead of time.

## Stage Set-Up

A stage riser is preferable which is kept free of furniture and props. Leanne does not make use of a lectern and ideally this is removed or moved to the side of the stage to allow Leanne to make full use of it. A small table is requested to either side of the stage where Leanne can leave water and copies of her book.

## Your Checklist:

- Lapel mic or headset
- Comfort screen
- Clicker

We look forward to a successful and impactful event!
